

Mobile Lite

Portable Personal Emergency Response System

Giving You Peace of Mind Anywhere and Everywhere

Climax's Mobile Lite, a 3G personal emergency response system (PERS) with GPS location tracking functionality, provides protection for seniors at home, in the yard, or on the go. The lightweight, portable Mobile Lite goes beyond typical emergency response products by integrating both safety monitoring and telecare capabilities. Mobile Lite was designed to be easy to use, with raised guidance buttons for easy access to open two-way voice communication with the central monitoring station (CMS). Leveraging industry certified A-GPS technology, Mobile Lite provides GPS location positioning, expediting the assistance deployment process during an emergency. The positional information can be easily accessed via Climax Home Portal Server's map service, Climax's "Eye of Care" software or SMS messages. These advanced features make Mobile Lite the best companion for active, healthy, and worry-free aging.

Supporting Active Aging

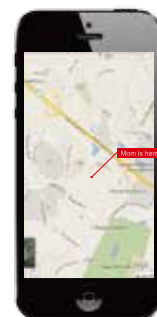

- Portable PERS for both indoor and outdoor protection
- GPRS/SMS/Speech Reporting
- GPS and Location-based Services (AGPS)
- Location coordinates viewable on Climax Home Portal Server's map service, Climax's "Eye of Care" software and smartphones
- Extensive Two-Way Voice Communication Range

How can Care Personnel and Family Members Locate You?

Positional information is available on Climax Home Portal Server's map service or Climax's "Eye of Care" software.

Smartphones, via SMS message, can be used to link to Google maps to view the user's location information.

* Map service is powered by Google Maps data.

Mobile Lite

Portable Personal Emergency Response System

User-Friendly Features

LED Indicators

Double LEDs enables user to know Mobile Lite's battery and cellular connection status at a glance.

Raised Buttons

Mobile Lite's raised bumps on the button are configured to quickly guide user's fingers to the activation button under low light for easier accessibility.

Voice Prompts

Voice prompts alert the user to key events such as the progress of emergency calls and low battery status.

Additional Features

- Saves up to four numbers for emergency calls
- Mobile Lite can work with up to five Emergency Pendants and Fall Sensors
- Reporting formats include CID, SIA and XML protocols over IP, speech mode, and SMS messages
- Simultaneous voice and location reporting
- Geofence alerts can be generated when the user leaves a defined safe area (optional)
- Scream location alert feature
- Remote programming
- Remote firmware upgrade
- Automatic check-in reports
- Micro USB or travel charger for the user to charge the unit on the road

Specifications

Battery	3.7V, 800mAh Lithium rechargeable battery x1
Battery Backup Time	48 hours*
Speaker	93.5 +/- 3.0dB at 10cm
GPRS (PS data rate)	HSUPA category 6 (5.76 Mb/s UL) HSUPA category 8 (7.2 Mb/s DL)
SIM Card	Supports 1.8V and 3V micro SIM cards
Available Radio Frequencies	433MHz / 869MHz (EN-300-220, Class 1)
Radio Frequency Range	433MHz / 869MHz: 3 meters in open space
Operating Temperature	-10°C to 45°C (14°F to 113°F)
Operating Humidity	Up to 85% non-condensing
Dimensions	41.5 x 23.3 x 71.2mm

* Note: Actual battery life may vary due to product settings, cellular coverage, talk time, and user activity.

** Note: Service availability is not available everywhere and at all times. Current GPS location may not always be available in every situation.
