

PB-23ZW Panic Button

Summoning Help with One Button

- Waterproof
- Residential and commercial applications
- Compatible with any Z-Wave system and devices

The PB-23ZW panic button is designed for the user to summon help with one simple button press when an emergency arises. In a critical situation such as a fall, acute medical problem, fire, or burglary, the user can quickly identify the big red button and activate the device to report an alarm to monitoring personnel.

The effective security solution provided by the PB-23ZW has residential and commercial applications. It can be installed in the homes of elderly individuals to make their independent living safer. It can also be used in gas stations, convenience stores, hospitals, or other establishments where employees have to work during late hours. When pressed in times of distress, the button triggers a silent alarm to bring emergency assistance to the user.

Its LED indicates connection to a Z-Wave network as well as reception of the control panel's signals. The panic button transmits supervisory and low battery signals to the security and smart home panel to ensure its proper operation at all times.

Features

- Big red HELP button for quick identification and activation
- Wireless allows for mounting on wall or placed on flat surface
- LED indicates connection to a Z-Wave network and reception of the control panel's signals
