

PCU-3ZBS Pull Cord Unit

One Pull Can Be Life-Saving

Wireless ZigBee Pull Cord Unit PCU-3ZBS can be quickly installed in any accessible indoor locations for the user to pull for emergency help. When pulled, this wireless device will trigger an alarm, which will be sent by its connected medical alarm to the monitoring center or care personnel. PCU-3ZBS's intuitive design is very user-friendly to ensure users know how to use it without further learning.

The wall-mounted or ceiling-mounted PCU-3ZBS can be life-saving when the user does not wear a personal trigger. It gives the user an extra means to raise an alarm and therefore increases chances of rescue.

PCU-3ZBS requires very low maintenance and low battery consumption. Its functions of automatic low battery reporting and 24-hour supervision prevent operational irregularities and strengthen protection for the user.

Features

- White cord with a loop for pulling
- For indoor installation
- Wall-mounted or ceiling-mounted
- Low battery consumption
- Requires low maintenance
- 24-hour supervision transmissions ensure proper operation
- Low battery detection
- LED indicator
- Wireless for easy installation
- Compatible with other manufacturers' ZigBee systems

Specifications

Communication Protocol	ZigBee Pro Home Automation 1.2
Frequency	2.4GHz
Power Source	3V, CR2 Lithium battery x 1
Battery Life	8 years*
Cord Length	17.5 cm
Operating Temperature	-10°C to 45°C (14°F to 113°F)
Operating Humidity	Up to 85% non-condensing
Dimensions	81.2mm x 81.5mm x 43.5mm

* Note: Actual battery life may vary with product settings, operating environment and usage.
