

Climax Launches Google Assistant Voice Control Integration on Climax Home Portal Platform

Arm your smart home security system with the latest Google Home voice-control integration

Taipei, Taiwan—June 13, 2018— Integration with Google Assistant & Google Home is now available on Climax Home Portal Platform, allowing Climax smart home security devices to be even more convenient to use and improved comfort, safety, and lifestyle for users.

Voice Control with Google Assistant

Climax Home Portal Platform now works with Google Assistant & Google Home, allowing users to control their smart home security system with their voice.

Users will be able to arm, disarm, and home arm their security system by speaking to the Google Home device. Climax voice control by Google Assistant also allows users to control electronic appliances, light dimmers, open/close motor shutters/blinds, apply scenes*, and trigger emergency medical alerts, all without needing to pick up a smartphone or lifting a finger.

Connecting Google Home with Climax Home Portal is easy and simple. A user simply says “OK Google, talk to climaxhome.”**, Google Assistant will then bring up the Climax Portal login page to connect and authorize account linkage. Users can then discover all the devices connected to the gateway and then, their home is ready for voice control.

Cimax Technology will continue to add integrations and features to Climax Home Portal Platform, to further expand home safety and security for consumers and their loved ones.

*Note: Scene-activation depends upon gateway and selected devices.

**Note: Requires Google Home speaker to be connected to a working ethernet WiFi connection. For more detailed setup instructions kindly refer to our user manuals.

About Climax

Climax is a security, telecare, and smart home complete-solutions provider that integrate wireless security, senior care, home automation, energy management, emergency monitoring, and live visual monitoring into innovative all-in-one solutions. For over three decades, Climax has applied its expertise in telecommunications and wireless radio frequency (RF) technologies to develop security features, such as world-leading 2-km RF range, VOIP, and reliable communications, into our security, senior care, and smart home solutions. Our company has relentlessly pursued perfection in technology, production, value and service with the objective of providing the best protection and care for every home and individual.
