

TG-15N Outdoor Tag Reader

TG-15N is an outdoor tag reader that provides you the easiest and quickest way to arm and disarm your home alarm system.

It is designed to be installed at the entrance of your home so you can conveniently access your security system before entering the house. This device is integrated with NFC labels so you can quickly guard your home with just one simple swipe. No more complicated keypads or worry about forgetting or changing your pin code.

TG-15N shows the status your security system via its dual-color (green and red) LED. It flashes the green light when your security system is armed and the red light when an alarm has occurred or is taking place. The LED light goes off when your security alarm is disarmed.

TG-15N simplifies the operation of your security system and lets you know the system status with a quick glance. Installing this device at the entrance of your home also helps to alert others that your property is under alarm protection.

Features

- Arm/disarms the alarm system
- Button-free; Single Scan function
- Stores up to 40 NFC labels
- Dual-color (green and red) LED display for system status
- 2 way communication
