

WCS-1A/E-ZBS Smart Wall Appliance Switch

Easily Control Any Home Appliance at One Touch of One Button

WCS-1A-ZBS

WCS-1E-ZBS

- Easy installation – no wiring required
- Easy control of lighting or any home appliance
- Expansion of home automation options

WCS-1A/E-ZBS is a Zigbee wall-mounted switch designed to remotely turn on/off lighting or any home appliance. The smart switch can be paired to any ZigBee devices to facilitate the use of on/off on any home appliance or lighting.

The battery-operated WCS-1A/E-ZBS can be installed in any place of home without the limitation of hardwired power source. The completely wire-free wall appliance switch simplifies installation efforts and is ideal for the expansion of home automation options in new or retrofit home where cabling solution are limited.

Features

- Controls the on/off status of a light or home appliance
- Two-way communication
- Compatible with any Zigbee networks and devices
- LED indicator light makes it easy to find in the dark
- No wiring required
- Install quickly and easily
- Simple and modern style
- For indoor use only
- CE/FCC compliance
