

PSM-29 Power Meter Switch

Green Power, Green Savings

- Remotely turn on/off home appliances
- Slimmer design for better aesthetics
- Simple plug and play installation

PSM-29 is designed for the user to remotely turn on/off an electronic appliance via a smartphone or a web browser anytime, anywhere. The integration of this device into your home automation system will allow you to conveniently control home appliances for comfort or energy-saving purposes.

PSM-29 has a built-in power meter to measure electricity consumption. The collected energy data will be reported to the control panel. These energy consumption reports are viewable online and can help you form an effective strategy to reduce electricity bills. Installation of PSM-29 takes only a few seconds. Simply plug the power switch into the power outlet and then plug the appliance into the front socket. Besides easy installation, the compact design of PSM-29 offers a polished and modern look that blends naturally with your home décor.

The slim-sized design of PSM-29 blends naturally into any home décor. PSM-29 enables you to control home appliances and reduce electricity bills. Creating a green home has never been easier!
