

RC-29ZBS ZigBee Remote Controller

Seamless Protection

RC-29ZBS wireless ZigBee Remote Controller offers users more convenience and flexibility, allowing control of their alarm system from a distance away before entering the home or after exiting. Use the RC-29ZBS to easily arm, disarm, and home arm your alarm system at your fingertips. When under an emergency situation, you can also activate the Panic Alert button with a simple press of button. Functionality and peace of mind all packaged into a compact remote control.

RC-29ZBS is compatible to other manufacturers' ZigBee security system and can be integrated into new or existing ZigBee systems. The wireless key fob is designed to fit on a key chain, in a pocket or purse, or on your bedside table - anywhere you would like instant wireless control of your alarm system.

- Extremely convenient and portable keychain design
- Four buttons: Arm / Disarm / Home / Panic
- Attractive add-on to ZigBee security systems
